

### AMENDMENTS TO THE CLAIMS

Please amend Claims 1-6, 8, and 9 as follows:

Please add new Claims 10 and 11 as follows:

1. **(Currently amended)** A connection coupling for ~~transferring gaseous and/or liquid fluids, especially for filling gas tanks of motor vehicles~~ connecting to a nipple of a tank of a motor vehicle, the connection coupling comprising:

a front housing part;

a sliding sleeve for locking connecting profile sections, especially collet chucks, of the connection coupling onto the nipple, the sliding sleeve being movable in a longitudinal direction with respect to the front housing part; and

wherein a data interface, especially a data transmitter, is arranged on the sliding sleeve and configured to indicate matching of the connection coupling with the nipple, at least a portion of the data interface being movable in the longitudinal direction with the sliding sleeve.

2. **(Currently amended)** A connection coupling according to claim [[1]] 10, wherein the data transmitter is fastened to the circumferential surface of the sliding sleeve.

3. **(Currently amended)** A connection coupling according to claim [[1]] 10, wherein a protective tube is arranged between the front housing part and the a rear housing part of the connection coupling.

4. **(Currently amended)** A connection coupling according to claim [[1]] 10, wherein the data transmitter comprises a data line which can be connected with a fluid line.

5. **(Currently amended)** A connection coupling according to claim [[3]] 4, wherein the data line is guided in the protective tube parallel to the housing.

6. **(Currently amended)** A connection coupling according to claim [[1]] 10, wherein the data transmitter is provided with a ring-like configuration and is arranged around the sliding sleeve.

7. **(Previously presented)** A connection coupling according to claim 6, wherein the data transmitter is shrunk onto the sliding sleeve.

8. **(Currently amended)** A connection coupling according to claim [[1]] 10, wherein the data transmitter is embedded in a covering of the sliding sleeve.

**Application No.:** 10/506,397  
**Filing Date:** May 19, 2005

9. (Currently amended) A connection coupling according to claim [[1]] 10, wherein the data transmitter is arranged as a transponder.

10. (New) A connection coupling according to claim 1, wherein the data interface is a data transmitter.

11. (New) A connection coupling according to claim 1, wherein the profile sections are collet chucks.
